

A satisfactory discussion of the main concepts of analysis (such as convergence, continuity, differentiation, and integration) must be based on an accurately defined number concept. We shall not, however, enter into any discussion of the axioms that govern the arithmetic of the integers, but assume familiarity with the rational numbers (i.e., the numbers of the form  $m/n$ , where  $m$  and  $n$  are integers and  $n \neq 0$ ).

## List Of Mark

- |  |  |
|--|--|
| 1. <b>satisfactory discussion:</b> 令人满意的讨论, P <sup>1</sup> | 2. <b>concepts:</b> 概念, P <sup>1</sup>         |
| 3. <b>convergence:</b> 收敛, P <sup>1</sup>                  | 4. <b>differentiation:</b> 微分, P <sup>1</sup>  |
| 5. <b>accurately:</b> 精确地, P <sup>1</sup>                  | 6. <b>shall:</b> 助动词, 类似于 will, P <sup>1</sup> |
| 7. <b>axioms:</b> 公理, P <sup>1</sup>                       | 8. <b>govern:</b> 统治, 管理, P <sup>1</sup>       |
